BIRLA AEROCON DRY WALL PANEL

Crack free, smooth & seamless interior walls

➡ Metalcraft shelters drywall construction vs traditional and containers cabin in market

			
Feature	Drywall Build	Traditional Build	Containers
Building Material	Built with high Quality Steel	Built with Sand, Cement, Brick, Water	Repurposed shipping containers
Speed	3x faster construction and installation	Linear construction one step at a time	Time intensive
Custom	Customisable size, layout and aesthetics	Structure is fixed for life	Size limited by container dimensions
Durability	Meets all standards of construction & is highly durable	Quality concerns due to involvement of multiple contractors	Needs heavy maintenance
Efficiency	Energy usage is less due to thermal & noise insulation	Large quantity of construction waste	Not energy efficient
Construction	Prefabricated off-site & installed on-site	Built on-site	Require extensive on-site work

● Types of application

Metalcraft shelters is an excellent option for individual seeking to construct robust multi-storey structures in a timely manner. suitable locations for such application include.

**COMMERCIAL
BUILDING**

WAREHOUSE

● Advantages of prefab construction and MS structural shed

- **Speed of Construction** – Factory-made components reduce on-site construction time by up to 40–50%.
- **Cost-Effective** – Lower labor costs, reduced material wastage, and faster project completion save overall expenses.
- **Quality Control** – Prefab elements are manufactured in a controlled environment, ensuring uniform quality and precision.
- **Less Site Disruption** – Minimal on-site work reduces dust, noise, and disturbance to surrounding areas.
- **Sustainability** – Prefab uses recyclable materials and generates less waste, making it eco-friendly.
- **Flexibility & Customization** – Easy to expand, modify, or relocate as per future requirements.
- **Weather Independence** – Since most work is done off-site, construction is less affected by rain or harsh weather.
- **Durability** – Prefab structures are designed to be strong, corrosion-resistant, and long-lasting

CLIENT TESTIMONIALS

What Our Clients Say

From the initial planning stages to the final walkthrough, Metalcraft shelters demonstrated exceptional attention to detail. The quality of their workmanship is outstanding, and they completed our project ahead of schedule.

Anubhav singh.

Safety was a top priority for us, and Metalcraft shelters consistently demonstrated their commitment to maintaining a safe work environment. They were reliable, trustworthy, and delivered a high-quality project with minimal disruption.

Rakesh Sinha
